

**This is our appointment for you and with you.**

## **WELCOME TO VILLA EUROPA!!!**

---

### **CO-HOUSING**

In 1965 in Italy nobody spoke of co-housing, which became a recognized and appreciated phenomenon only a few years ago. 50 years ago Villa Europa was already built following an idea of sharing spaces and activity. Our guests have their own apartment, but they can share spaces, time and common services with other guests. The shared values are the respect, the collaboration, the socialization and the safety.

### **PROMOTION OF THE TERRITORY**

We put in foreground the nature and the environment and we desire to promote a deep knowledge of our territory and its natural and cultural beauties through informations and material we give to all the guests. Villa Europa is at the feet of Mount Calamita, which is part of the National Park of the Tuscan Archipels and loved place for trekking and bikers and for minerals. In the common room of Villa Europa our guests will find all the books and informations to discover the island and what it offers to whom wants really to know.

### **ENERGY**

We use lower consumption lamps always in the garden and indoor where is possible; we use sun energy lights in the paths. We invite you to switch off lights or fans if you are not in the apartment.

### **WATER**

We use small technologies to save water and we ask our guests to do the same in order to reduce its waste. We suggest therefore also to use the washer only if you can fullfill it.

### **GARBAGE**

We support to divide the garbage, when possibile and we suggest our guests to do the same even if sometimes there are some difficulties to find garbage bins.
